SUMMARY

Full Stack Developer and Alibaba Cloud Certified Engineer with hands-on MERN stack experience, strong data analysis skills, and a passion for clean code, scalable cloud solutions, and continuous learning.

WORK EXPERIENCE

Frontend Developer – PARI Technologies (M) SDN BHD

Sep 2024 – Present

- Led a complete revamp of the website frontend with modern, responsive UI using React and Tailwind CSS.
- Enhanced accessibility and usability aligned with UX/UI best practices.
- Optimized backend integration by combining MongoDB with existing SQL architecture.
- Reduced database costs by ~50% via hybrid SQL/NoSQL structure.
- Boosted app performance and scalability while maintaining data integrity.

PROJECTS

Full Stack Learning Platform

A responsive educational platform with AI-assisted course creation and admin control.

- Developed a dynamic platform for browsing and managing online courses.
- Integrated AI to auto-generate course content from user inputs.
- Built secure token-based authentication system.
- Implemented email backend and admin dashboard with full CRUD operations.

Legends Team Website

An engaging tourism platform with admin tools.

- Animated, responsive UI with scroll effects for tours and galleries.
- Dynamic tour pages with error handling and fallback UI.
- Admin dashboard for managing tours and media content.
- Enabled real-time content updates via client-server communication.

Interactive Data Dashboard (Tableau)

A story-based multi-page dashboard for business insights.

- Combined bar charts, line graphs, and KPIs with interactive filters.
- Included drill-down capabilities and tooltip navigation.
- Tailored for business storytelling and academic data presentations.
